we would literally astound ourselves."**

-Thomas Edison

Greetings!

This is a season of excitement for Atlanta Technical College! During 2023, we have seen our students succeed, our business partnerships thrive, and lives transformed through the power of technical education. Recognizing the successes of the past year remind us of the opportunities that lie before us, and we are focused on how Atlanta Technical College can find new and creative ways to empower the community and continue to increase our impact, particularly in the areas of workforce development and economic mobility.

Victoria Seals, Ed.D.

Enrollment and retention numbers are increasing, our job placement rate is holding steady at 97 percent, and we are always exploring new opportunities and imagining new avenues for student success. We continue our work to advocate for the funding needed to renovate and to expand the Henry Louis "Hank" Aaron Academic Complex, where most of the classrooms, labs, and offices are located. The expanded facility will house the college's One Stop, the Center for Artificial Intelligence (AI) and Advanced Manufacturing, and the Center for Film and Media Production.

Planning and design of the Center for Transportation and Logistics is well underway, and, with its opening, the college will expand opportunities for commercial truck driving, warehousing, and other logistics related programs. We are also eagerly planning for the opening of the Small Business Development Center, which will be a place where entrepreneurial ideas can develop and thrive.

Atlanta Technical College is doing great things, and we are building our capacity to do more. In this annual report, you will find details of our accomplishments for the past year and our plans to continue our transformational work. I hope you will share this report with others and encourage them to explore how Atlanta Technical College can change their lives.

We appreciate your support as we imagine the possibilities.

Best wishes,

Victoria Seals

Victoria Seals, Ed.D.
